

ENBRIDGE PIPELINE MAINTENANCE IS UNDERWAY IN YOUR AREA

**BEGINNING NOVEMBER 1
AND CONTINUING THROUGH
MID-NOVEMBER**

A portion of South Pine Grove Drive in Homer Glen will be closed to accommodate pipeline maintenance work.

Enbridge Energy operates the world's longest liquid petroleum pipeline, which transports North American petroleum to and through Illinois to Midwest refineries and beyond. As part of our ongoing maintenance program, crews will be working on our pipeline system in your area, which will result in a temporary closure of the portion of South Pine Grove Drive between Oakwood Court and Mulbanny Drive.

Please watch for posted detour signs and use caution when driving near areas of pipeline maintenance. Watch for flaggers, construction signs, and slow traffic. Our first priority is to protect communities along our pipeline route and our employees and contractors. We appreciate your patience during pipeline maintenance activities and apologize for any inconveniences.

Thank you. Your safety is important to us.
