

CRÈME ROAD DRAINAGE PROJECT

November 14, 2016

On or about Monday, November 28, 2016, the Homer Township Road District will begin a Drainage Improvement Project on Crème Road between 147th Street and 143rd Street. The project will take two (2) to three (3) weeks to complete. The variation in the expected duration of the project is due to unforeseen weather conditions we may experience during construction.

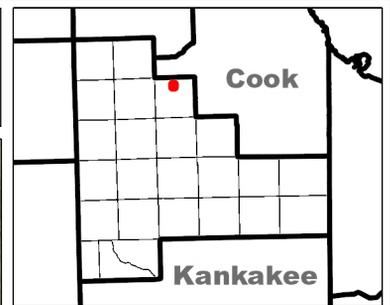

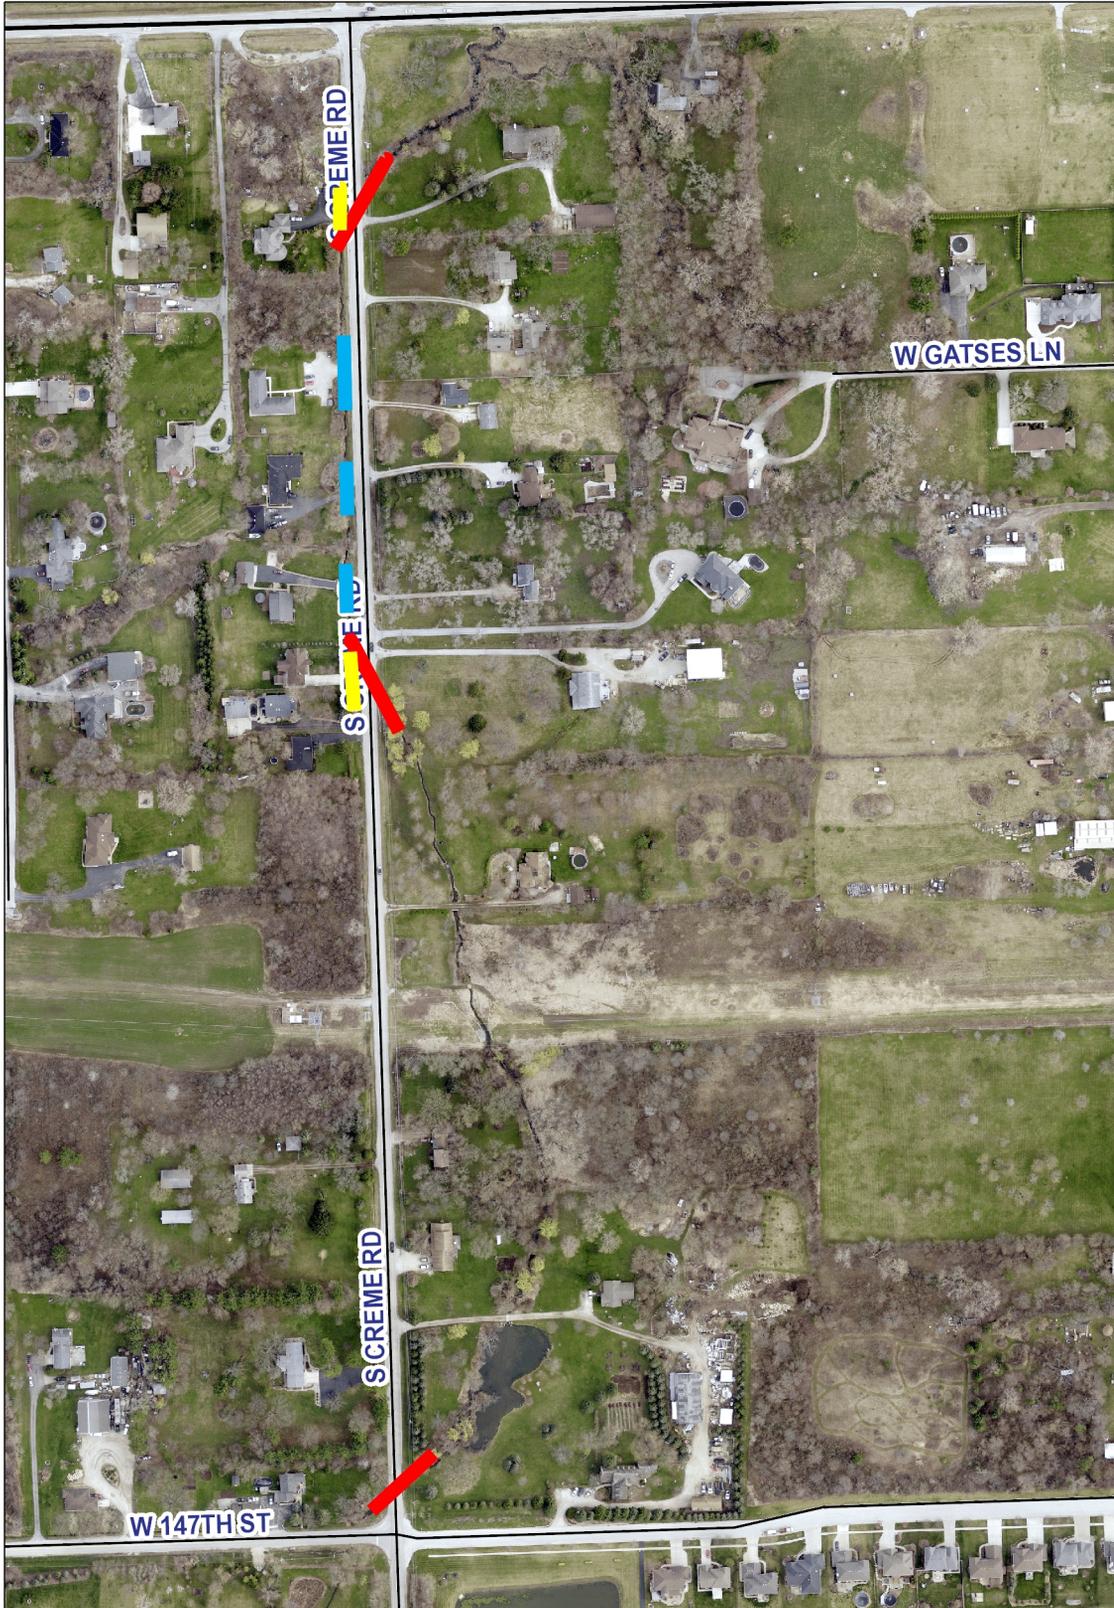

Crème Road will be closed to through traffic for the first week of the project when the three (3) major cross culverts will be installed. Once the cross culverts are installed, the project will continue for about another week with daily lane closures and flaggers directing traffic through the site. There will be daily updates of the progress of the project posted on our website (www.homerhighway.com) throughout the entire duration of construction.

After our initial contact with those local residents who will be directly affected by the road closure, we will host an open and public Pre-Construction Meeting at the Road District. The Road District staff and management staff from Norvilla Construction, the contractor who was awarded the project will be there. **The meeting will be at the Homer Township Road Dist on Saturday, November 19th at 10:30 AM.** At this meeting, the project will be discussed in detail and representatives from the contractor and Road District will be able to address all of your concerns.

Hopefully, this letter will provide enough information to alleviate most of the inconvenience construction presents. If not, please feel free to call our office to insure your open line of communication and assistance during construction. We invite all residents who will be affected by this project to attend our meeting and/or contact us for more information.
